Aalok Tanwar

☎ 9625090685 aaloktanwar.dev@gmail.com linkedin.com/in/aalok-tanwar github.com/tanwarAalok

Technical Skills

Languages: TypeScript, Java, JavaScript, Python, C++, SQL
Frameworks & Libraries: React Native, Spring Boot, Node.js, React.js, Express.js, Next.js, GraphQL, LangChain
Infrastructure & Tools: AWS (ECS, RDS, VPC), Docker, Kafka, gRPC, Redis, MongoDB, PostgreSQL, RAG
Observability & Resilience: Resilience4j, Prometheus, Grafana, Elasticsearch, LocalStack

Experience

Accenture **Nov 2024 – Present**
Advanced App Engineering Senior Analyst *Gurugram, India*

- Driving **AI enablement** across multiple client teams by architecting custom GitHub Copilot agents for automated LLD generation, code synthesis, and intelligent defect remediation, significantly streamlining developer workflows.
- Spearheaded the ground-up development of a **Node.js** and IBM DataPower **Backend-for-Frontend (BFF)** layer, implementing dynamic Server-Driven UI via Mustache templating to completely decouple and eliminate redundant client deployments.
- Maintained a high-traffic telecom application by engineering new cross-platform features and resolving a wide range of critical defects across a **React Native, GraphQL,** and **Redux** codebase.

Tutcart **Jan 2024 – Mar 2024**
Full Stack Developer Intern *Remote*

- Built a real-time communication engine using **Socket.io**, **Next.js**, and **Express.js**, supporting low-latency group and 1-on-1 chat for interactive learning sessions.
- Integrated an admin logging and analytics pipeline using **Elasticsearch** and **MongoDB** to monitor and analyze live API traffic patterns.

Kylo Apps **Oct 2022 – Dec 2022**
React Developer Intern *Remote*

- Designed and shipped responsive admin dashboards in **React.js** with Bootstrap, integrating REST APIs for real-time data management.
- Built and deployed a high-traffic Career portal using **Next.js** and MongoDB, covering job listings, application flows, and content management.

Projects

Patient Management Microservices System | *Spring Boot, AWS, Kafka, Redis, Resilience4j, gRPC, Docker*

- Designed a production-grade distributed system with **Patient**, **Billing**, and **Analytics** microservices in **Spring Boot**, with clear service boundaries and separation of concerns.
- Implemented **Resilience4j Circuit Breakers** and **Rate Limiting**; integrated **Kafka** for async event-driven updates and **gRPC** for low-latency internal service calls.
- Automated infrastructure provisioning via **Java CDK (IaC)** for reproducible **AWS LocalStack** deployments; containerized all services with **Docker**.
- Configured **Prometheus** and **Grafana** dashboards for real-time observability and performance monitoring across all services.

Open Source Contributions

OpenLogo – Team Shiksha | *React.js, Node.js, MongoDB*

- Contributed **12 merged Pull Requests** spanning frontend features, backend optimizations, and bug fixes.
- Refactored core authentication flow with **Protected Routes** and centralized global state management, improving security and consistency.
- Built a backend **Search API** with optimized query patterns; engineered a custom **Toast Notification system** and fixed mobile-responsive navigation issues.

Certifications & Achievements

- **Accenture ACE Award (2× recipient)** – Recognized for technical excellence and outstanding project delivery.
- **Google Cloud Associate Cloud Engineer** – GCP Certification.
- **AR & VR Certification** – FutureSkills Prime & CDAC Pune.

Education

Vellore Institute of Technology **2020 – 2024**
Bachelor of Technology in Computer Science *CGPA: 8.5/10*
